Spleißkassette SE 8mm Splitter / LC-D Kupplung

This diagram shows an exploded view of a mechanical assembly. The central component is a large gear with a central shaft hole and several smaller holes. To its right is a smaller gear with a similar shaft hole. Above the main gear is a complex housing or cover with multiple mounting points. Below the main gear is a smaller component, possibly a bearing or a support. The entire assembly is shown within a circular frame, likely representing the outer casing or housing.

Installationsanweisung

1. Führung der Fasern in Spleißkassettensockel

2. Spleißkassettenbefestigung

- Spleißkassetten im rechten Winkel einrasten bis es „Click“ macht
- Fasern in den am Drehpunkt in der Spleißkassette liegenden Faserkanal einlegen
- Fasern müssen sich unter den Niederhaltern befinden

Installationsanweisung

A detailed line drawing of the back of a cassette tape, showing the internal mechanism. The diagram is symmetrical and includes the following labels and components:

- Top Labels:** 'A' and 'B' are positioned at the top corners, indicating the locations of the tape's end flanges.
- Internal Components:** The central area shows the tape reels (spools) and the tape path. The tape is shown as a continuous line winding around the reels.
- Labels on the Left Reel:**
 - cable _____
 - tube _____
 - fiber _____
- Labels on the Right Reel:**
 - cable _____
 - tube _____
 - fiber _____
- Bottom Label:** 'cassette no.' is located at the bottom center, indicating the location for the cassette number.
- Bottom Components:** The bottom section shows the tape's end flanges and the internal mechanism for the tape's movement, including the tape's end flanges and the tape's end flanges.

A detailed line drawing of the back of a cassette tape, showing its internal mechanical structure. The diagram includes labels for various components: 'cable', 'tube', and 'fiber' on both the left and right sides; 'cassette no.' in the center; and 'A' and 'B' at the top and bottom. The drawing also shows the tape reels, the tape itself, and the various mechanical parts that hold the tape in place.

Installationsanweisung

A detailed line drawing of the back of a cassette tape, showing its internal mechanical structure. The diagram is symmetrical, with two main halves separated by a central vertical axis. At the top, there are two small rectangular components labeled 'A' and 'B'. The central area contains two large, irregularly shaped components, each labeled 'cable', 'tube', and 'fiber' with three lines for text entry. Below these, there are two circular components, one of which is shaded with a grid pattern. The bottom section features two vertical assemblies, each with a series of horizontal lines representing a spring or retractor mechanism. The entire diagram is enclosed in a rounded rectangular border with various small details like screws and mounting points.
